DIES/CREST Online Training Course for Supervisors of Doctoral Candidates at African Universities

There is a need for more African scholars and scientists to contribute to innovation and development on our continent and to enhance Africa's participation in the knowledge economy. Due to the rapid increase in doctoral enrolments at African universities in recent years, many more well-prepared supervisors are needed at African universities.

This DIES/CREST course offers a flexible study opportunity to academic staff members, particularly novice doctoral supervisors, who are interested to advance their knowledge, skills and networks in doctoral supervision.

The course is presented over eight weeks. There are two offerings of the course in 2020, from 11 May – 10 July 2020 (followed by a practical assignment due on 7 August 2020) and from 10 August – 09 October 2020 (followed by a practical assignment due on 09 November 2020).

The closing date for applications for the first offering is 3 February 2020. Successful applicants will be notified by 10

Prof Johann Mouton Director of CREST

Offered by

Funded by

DAAD

Deutscher Akademischer Austauschdienst
German Academic Exchange Service

HRK German Rectors' Conference
The Voice of the Universities

Who are the participants?

Admission requirements:

- Employed by or affiliated to a university in Africa,
- A doctoral degree
- Supervise or co-supervise doctoral students (or be expected to do so in the future)
- A letter of support from head of department or dean

3 Cohorts (2018-2019)

2 more rounds will be implemented 2020

So far:

272 participants

Pass rate: **76%**

Duration: 8 weeks

Activities: Fully online; all compulsory

Assessment: Capstone assignment

SU Certificate of competency

Lecturers without PhDs to lose their jobs

A new online course for doctoral supervisors is aimed at building the capacity of higher education staff in the face of growing demand for PhDs throughout the African continent and concomitant low completion and high student dropout rates.

The Centre for Research on Evaluation, Science and Technology (CREST) and the Centre for Higher and Adult Education, both at Stellenbosch University in South Africa, and the Centre for Higher Education Research, Teaching and Learning at Rhodes University in South Africa joined forces to develop the course.

"If you want PhDs, you need supervisors," Professor Jan Botha, one of the training facilitators based at CREST, told *University World News*.

Africa's enhanced participation in the global knowledge economy calls for many more talented Africans who have been educated to the highest academic levels, and individuals who understand the socio-economic challenges of African countries, and are committed to the development of the continent, he said.

Botha said the link between the availability of high-level talent, PhD graduates and enhanced socio-economic development has been argued convincingly by academics such as Spanish sociologist Manuel Castells.

Institutional Ecosystem

Facilitation approach

Feedback on course presenters' facilitation approach

Participant response to statement:

The facilitators use appropriate methods to convey the knowledge

"I believe they are guiding us well, they are following on posts and prompting us well."

"It is great to learn from the experts in the field and makes me realise how much I still have to learn."

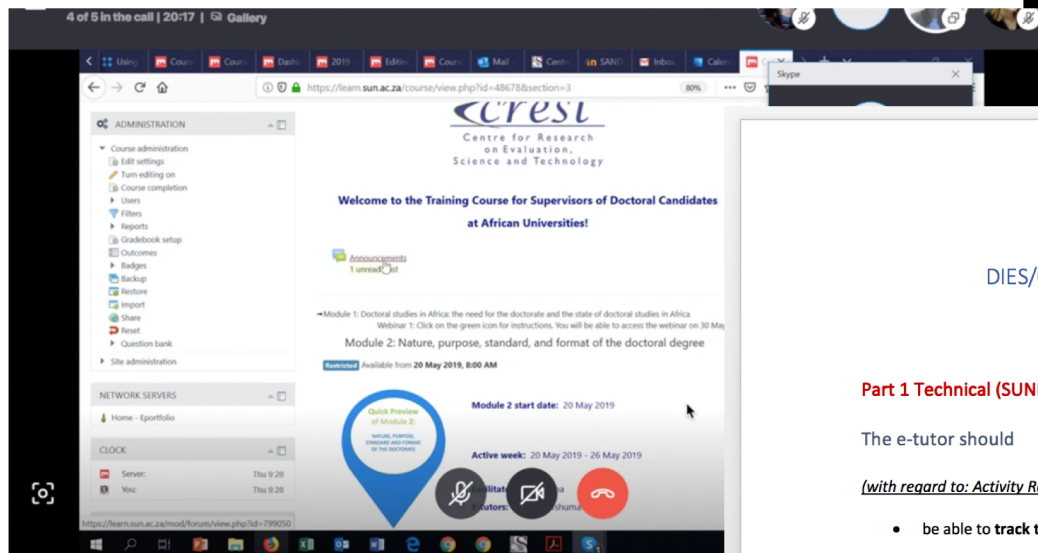

- Comments from survey

Participant response to statement:
The tutors enhance my learning experience

Remote E-tutor Training

DIES/CREST online tutor training / information session

Part 1 Technical (SUNLearn-related)

The e-tutor should

(with regard to: Activity Reports / tracking / logs):

- be able to **track the activities of the online students**
- know the easiest way to **download the logs/reports** in a clear format, as they will have to share it and report back to the course facilitator(s) (e.g. Prof Botha) on a weekly basis
- be able to flag and **follow up on individual participants** who are lagging behind

(with regard to: SCORMs, i.e. the online tutorials)

- access **SCORM activity reports/responses** (and possibly download question responses to send to the Profs)
- understand **how to download a SCORM** for offline use

(w.r.t.: Forums)

- understand **how the different forums work** (announcement vs. general forums, etc.); how to subscribe/unsubscribe to forums

Critical reflection

Netiquette

You can critique and even strongly disagree with others, as long as you remain courteous.

Show a willingness to acknowledge and respect others' viewpoints.

Share your own experiences, links to relevant news articles & other interesting online sources

However:
Try to stay on topic. Avoid posting irrelevant resources or links that might distract from the discussion.

Build on others' contributions as much as possible.

Take the time to read through, and continually return to discussions.

Keep your tone polite, yet conversational:
You are not expected to start/sign off your posts with formal greetings. You can address others on their first names.

Try typing in complete sentences and avoiding confusing jargon.

If someone else asks a question and you have a possible answer, a relevant experience/ resource to share, do reply.

Try to maintain inclusive to all your fellow participants by always communicating in the language that the majority of your peers/group members understand

TIPS for webinars: Participation / Presentation

Hosts:

- **At the start:**
 - Welcome your audience, introduce yourself, mention where you are streaming from, reiterate the topic / session outline, and when the webinar will end.
 - Inform the participants of the webinar will be recorded and how the video/audio or Ppt will be shared
 - Let participants know at which point you will be taking questions, and how they can contact you with follow-up questions.
- **Then:**
 - Stick to the time.
 - Have a 'Plan B' for technical glitches.
 - Consider a co-host to field questions and help you with the technical set-up.
 - Try to acknowledge participants by name if you take their question(s).

Participants:

- **Focus**

Avoid distractions such as social media sites or email pop-ups. Post a 'please do not disturb for the next hour' sign on your office door.
- **Engage**
 - You have the option to stay 'invisible', but webinars are intended for engagement and questions are always welcome.
 - If your question is not answered, send a personal e-mail to the webinar presenter. (Your question is usually not addressed due to a mere volume, not deliberate neglect).
 - Remember netiquette (Be polite – but not overly formal, keep comments concise and avoid jargon or slang).
- **Note**

Take (written/typed) notes of the most critical concepts and possible follow-up questions. Avoid trying to transcribe the webinar, as it will most likely be recorded.
